### Wire Stripper Machine

MAKE Bronneberg

MODEL Kab-X

Notes: 208-480, Three Phase, 4 HP  
Cuts from 1/16 to 3.5 inch od  
Production: Approx. 160 ft a minute  
420 lbs

The latest innovation, Kab-X is the only wire stripper available on the market equipped with 3 different wire stripping mechanisms: Double driven blades with gripping wheels on the side, squeezing rollers for single core thin cables, and a V-roll with blade system. The Bronneberg Kab-X has been developed together with health and safety experts offering a machine that complies with the highest of safety regulations.

Due to its phenomenal stripping speed of 160 feet per minute, allows large amounts of wire to be stripped, thus this machine has been geared towards reliable professional use. Thanks to the transparent polycarbonate hood the stripping process as well as the adjustment of the accurate guiding system can be monitored at all times.
